

## **Therapy at Penn Medicine Hospitals**

Our expert occupational, physical and speech therapists care for patients at the [Hospital of the University of Pennsylvania](#), [Pennsylvania Hospital](#) and [Penn Presbyterian Medical Center](#), including the hospitals' two skilled/subacute rehabilitation facilities. They are often the first contact with rehabilitation services for patients and their families.

Upon discharge, patients needing further care have access to a range of physical, occupational and speech therapy services available from Good Shepherd Partners. Whether they need [long-term care](#), [inpatient rehabilitation](#) or [outpatient therapy](#), patients can expect the same quality therapy and rehabilitative care that they received while hospitalized.

Address:

Penn Medicine Hospitals

Multiple Locations,

Philadelphia, PA 19146

Phone

[1-877-969-7342](tel:1-877-969-7342)

Our occupational, physical and speech therapists work closely with a patient's medical team including the doctors, nurses, nurse practitioners and physician assistants, to determine the most effective rehabilitation plan that will help the patient regain function. Therapists provide a range of specialized therapies based on the needs of the patient and physician. They evaluate patients and provide post acute-care recommendations for further rehabilitation.
